this morning saw some killers, called them sperm
whale at first tacked ship to south west for them
but never saw them afterward at 7 & M raised a
whale to leeward ran for him and he turned into
a finback Lat 34° 8' south Long 16° 18' west

Thursday the 28th had strong wind from the northward
steering southeast by south most of the time we
rain or fog at 1 o'clock P M spoke ship milwood
of New Bedford 6 months out with 500 bl sperm
oil, capt Church master he came on board a few minutes
in the mean time I caught a porpoise, and he said he had not got
one this time I saw him pull and he closed a t

Sunday November 1st on board barque Monmouth
this day had fair weather all day with light wind
steering for tristan at 10 o'clock A M saw a whale
lowered and chased but no success, we saw some blackfish
at the same time close to us so I struck one and killed
him but the other boats kept after the whale so I cut
from my fish and went after the other boats so we
the whale and fish too hoisted the boats up and steered
for tristan the remainder of the day at knight reefed
topwails and stood quater watches, tristan bearing south by
east dist about 15 miles

Monday had fine weather at 6 o'clock A M spoke
ship Hercules of new bedford capt swain, at 7 capt
went on shore at 8 myself and boat crew went in
shore a fishing and returned about 1/2 past 12 with
about one barrel of fish, capt came on board at 10 AM
at 1 P M laboard quater boat went a fishing at
10 this morning capt church from the millwood and
capt swain came on board and took dinner at 1 the
capt's all went on board the millwood to spend the
afternoon at 6 the laboard quater boat returned from
fishing and dressed the fish at 7 in the evening capt
came on board, took in sail and set quater watches

Tuesday commences thick weather with a kind of drizzling
rain made sail in company with the millwood
about 8 in the morning it cleared up to good weather
at 1/2 past 11 spoke the millwood and capt went on
board, and mate of the millwood came here and gained
untill sun set and went on board, carried sail all
knight no observation this day

Wednesday the 2th commenced fine no sail in sight
except the millwood at 10 this morning I got a porpoise
at 11 saw one right whale to windward bound to
northward very fast lowered but no success
Lat 36° 56' southe Long 11° 10' West

On Board. Barque Monmouth, November 5th 1840
Thursday had fine weather all day and saw a plenty of
whales all bound to northward and some going fast but
could not strike any of them, larboard quarter boat got very
near to one, but started him, we chased until noon and gave
them up, this afternoon chased again but but could not
strike, carried sail all night to northward, no observation

Friday had fresh breezes all day, saw one right whale,
lowered and capt started him afterwards saw 10,000 fin
backs but no right whale latter part had it thick and foggy
at 6 past 6 in the evening spoke the millwood again bound
east, afterwards we took in sail and hove to standing to west
ward nearly under short sail so as to make about a south drift
latt at 12 o'clock 36° 18' south, long by chr 09° 59' West

Saturday the 7th had fair weather untill the latter part,
had bad weather all night and all day Sunday lay to
most all day no observation this day

Monday had fine weather and saw nothing except
porpoises this morning we caught three of them
at 6 o'clock P M spoke the Letecia, an english barque
from Liverpool, bound to Batavia but did not get any near
except he came very near running foul of the xenophon
of sagharbour about the first of October with the loss
of two of his boats latt 35° 17' long 06° 44' west

Tuesday had tolerable fair weather and nothing in sight
all hands employed at mending sails at night took in
fore topgallant sail and fly gib and set quarter watches
latt 35° 23' south and long 04° 45' west

Wednesday the 11th had fair weather and saw nothing
except finbacks carried sail all night steering eastward
bound for the croets, the watch employed at mending
main topgallant sail after 4 o'clock we bent and set him
again, saw ten thousand fin backs and hump backs &c

Barque Monmouth November the 12th 1840

In lat 37° 04' south and long by chr 00° 03' east
Friday had fine weather and fresh breezes from the
northward steering east and east by n the at 10 o'clock this
morning we saw a whale to leeward called him wright whale
lowered two boats but he turned into a sulphur bottom
baced forward again and steered east all knight.

Saturday had fair weather and saw plenty of finbacks
first part the starboard watch employed at mending
foretopgallant sail, latter part the larboard watch
employed at putting a new gib stay &c

Sunday the 13th had fine weather and saw nothing
Bound east

Wednesday 18th the last three days has been fine, we
have had fresh breezes most of the time from the
southward, steer to eastward, no sign of any whale here
except a little whale few yesterday morning this
forenoon I pitched my boat, inside -

Lat 38° 45' south and long 24° 34' West

Thursday 19th from this day upto Wednesday the 25th
been steering eastward we have all kinds of weather
last Sunday we had a gale from north-west we
ran before it untill knight and took in sail and
have the next morning had it calm towards knight
had fresh breezes from northward next morning had
a gale of wind again, latter part, calm with a very
heavy swell, - we reel to and fro and stagger like a drunken
man, this day the ^{swell} is not quite so high, we have light wind
this morning but nothing in sight Bound east

Lat 40° 00' south and long 27° 00' East

at 4 o'clock this after noon saw

Thursday 28th }
8 right whales lowered and capt struck one and
his boatsteerer killed him afterwards capt got up
and lost his life, mate took him on board and V. fasten
to the whale and turned him up, took him aboard
at 11 o'clock Lat 50° 35' south long 28° 00' East

Barque, mormouth November the 26th 1840
Thursday first part had a gale from the north and west
we lay by our whale untill noon and commenced cutting,
finished at 5 P.M. and started the works we saved all the
whale except the head it being so rugged could not save it
latt 40 " 45 south long 28 " 20 East

Friday the 27th had fair weather saw 3 whales to leeward
early this morning lowered and I struck one, held on about
10 minutes and hauled, about 8 this morning saw another
lowered 2 boats, laboard quarter boat struck and boatsteerer
killed him after dinner cut him in and doubledreefed
the topsails for the night
latt 41 " 10 south and long 28 " 47 East

Saturday the 28th saw two whales, chased but without
succes, about noon lowered two boats again, after a while
I struck and he took my line chief mate bent on and
he took them both, chased him untill knighth and gave him
up, all hands tired out
latt 41 " or south long 28 " 45 East

Sunday the 29th first part had a gale of wind with
rain about 1 o'clock we coiled down the works, close reefed
the main topsail and took in the foresail, at noon
had it calm. stowed down 60 bbls in the fore hatch
and started the works again latter part had a gale of
wind again saw one whale but could not lower no
observation this day latt and long I nearly the same

Monday 30th all the first part had a heavy gale so
that we could not boil at noon took in the main top
sail and set the fore spencer and started the works
latter part it moderated a little so we set the main top
sail and fore sail again and hauled up the spencer
latt 39 " 37 south and long 28 " 30 {West} East

Bargue Nonmouth December 1st 1840

Tuesday, the 1st we had strong breezes all day, saw quite a number of whales all bound to south west, did not chase any of them

Wednesday commenced fair except a very heavy swell commenced stowing down in the main hatch about 9 in the morning, saw 2 whales, lowered and capt. struck and killed one of them, took him along side and stowed down about 70 lbs in the main hatch, and cut in our whale line
Lat 40 - 40 south And Long 28 - 58 West East

Thursday first part we had rather bad weather saw 2 whales chased but did not strike latter part the two quarter boats lowered and capt. struck and killed one which afterwards sunk saw several other whales at that time but soon disappeared afterwards we chased a hump back my boatsteerer darted but did not fasten so ends
Lat 41 - 05 south, And Long 28 - 49 East West

Friday the 4th - first part had tolerable fair weather saw 3 whales this morning lowered for them, rowed over and started them about 2 hours afterwards lowered for them again but no use latter part saw the same whales again going south
Lat 40 - 50 south And Long 28 - 49 West East

Saturday 5th fine weather but no wind commenced breaking out in the main hatch at 4 o'clock lowered and chased a whale capt. pulled up to him and his boat steerer darted against him but the whale was bent towards him so that his iron did not go into him we came on board and began to stow down saw one whale coming on board at 10 o'clock A.M. capt. lowered again for two whales and started them and came on board again saw no more whales all day stowed down 85 lbs we call the three whales 215 lbs
Lat 41 - 03 south And Long 28 - 35 West East

Barque Monmouth December the 6th 1840

Sunday the 6th had fine weather but no wind saw several whales chased one this morning but without success about 3 o'clock P M capt chased another but that was our share of him saw one after wards all of them bore to westward very fast
Lat 41° 01 South And Long 29° 55 East

Monday 7th had tolerable fair weather saw whales early this morning lowered and capt started them, we pulled along side and saw some more Mr sproatt and myself pulled for them, Mr sproatts boatsteer darted at one and missed him I carried my boatsteer up to his snall and he missed him, he hauled in his craft and fastened, and after a while Mr sproatt fastened to the other whale and capt came and fastened to my whale, the whales seperated and Mr sproatts iron broke and he lost his whale my whale run very bad and capt and myself sprading him every opportunity in about two hours I killed him and capt had a good set on him immediately afterwards, he died very soon after that and we got him along side about 3 o'clock P M and cut him in finished at bark and started the try works we saw several other whales this afternoon all of them moving about
Lat 40° 31 South And Long 28° 54 East

Tuesday commenced rather bad the wind blew strong from the south, and all hand feel quite old except myself I feel quite burkum as yet we saw ^{no whales} all day untill sun down we saw 7 or 8 whales then, but could not tell what they were we had good weather all this afternoon took in sail at 7
Lat 40° 43 South And Long 28° 00 East

Wednesday 8th we had fine weather all day at 2 o'clock the two quarter boats lowered for a lone whale, capt struck and killed him and he sunk they came on board and about 1 hour afterwards saw 2 whales the larboard quarter and waste boats lowered and I struck one and killed him and then capt lowered after that Mr sproatt struck the lone whale and he took his line then capt and myself cut of our lines and went after him and left Mr sproatt with the dead whale, we soon struck him again and I killed him, carried over

Barque monmouth December the 10th 1840
and capt went on board and took the other whale along
side, and left me alone, the whale turned up just
after dark and we took him along side and yoked them
up together and took in sail and set the watch
Lat 40 " 42 South And Long 28 " 00 East

Thursday ^{11th} had fine weather we cut in our whales
and saw several others capt lowered for one, but
could not get hold of him and he gave him up
Lat 41 " 10 South And Long 28 " 53 East

Friday ^{12th} had good and plenty of whales all around us
we stowed down 85 or 90 bl in the fore hatch
after that we thought we would go of and take another
so the larboard gaffer boat lowered and struck one
and I lowered and killed him took him along side
and took in sail and lay by him all night
Lat 41 " 10 South And Long " East

Saturday the 12th we made as much room in the
blubber room as we could and took in his head and
one lip before dinner, after dinner we finished cutting
there is plenty of whales all around us but we
had no room for any more at present
Lat 41 " 15 South And Long 29 " 14 East

Sunday the 13th we had a heavy gale from the
west employed at breaking out and stowing down in
in the starboard bow this day and as it commenced
Lat 41 " 10 South And Long " East

Monday the 14th had a gale from the west all day
and saw nothing we kept drifting from the whales
all the time, the wind is so strong that we cannot
carry scarce any sail, saw nothing all this day
Lat 40 " 44 South And Long 31 " 00 East

Tuesday had a gale from the west most all day
we made sail this morning but shortened very soon saw
nothing all day Lat 40 " 25 South Long 31 " 30 East

Barque monmouth, December the 16th 1840

Wednesday the 16th had westerly wind all day and saw nothing
struck down 95 lbs in the main hatch

Sunday 20th we have been beating to westward for the last 4
days against some a strong westerly wind and some times
none at all yesterday morning we saw a mountain of ice
at some distance of which appeared very large which this
after noon proved true for we passed it within about 7 miles
it appeared to be about $\frac{1}{2}$ mile in length and about three
hundred feet above the surface of the water, one of greenlands
icy mountains lat 40 " 50 Butt And long 30 " 49 East

Monday 21st had very strong winds from the west and saw
nothing Tuesday early in the morning had tolerable
good wind from the north and east at 6 this morning
saw the millwood of new beford capt church with one right
whale we both steered to westward all day after dinner we
bent another fore topsail the kept growing worse all day so
that we were obliged to take in sail before 8 at night
lat 40 " 50 Butt And long 30 " 30 East

Wednesday 23rd had a heavy gale from the northwest and
was obliged to lay to all day at noon we saw another
ship to windward we called her the gem of sag harbor
boiling saw no signs of whales all day
lat 41 " 25 Butt And long 30 " 00 East

Thursday 24th had not much wind but a very bad sea
saw a whale early this morning and lowered for him but
without success afterwards we saw the millwood take a whale
and soon after that we lowered for another and I struck
him soon after the capt fastened and his boatsteerer killed
him took him along side and finished cutting before dark
lat 41 " 11 Butt And long 29 " 40 East

Friday 25th had fair weather I awoke this morning and
saw the gem of sag harbor right from home, I felt so sure
of getting 3 or 4 letters, at noon we spoke her with 6
whale and we have 8 so I felt quite baskin, says
captain & I have you any letters for us not any
was the reply right from long island and not a solitary line

Barque Monmouth December 25 1840
 damn my feathers if I did not think that ~~that~~
~~that~~ ~~will~~ ~~generally~~ long island folks did think enough
 of a poor devil to send him one poor holy gasp,
 as if that said - and I see I am a damn fool after all
 this afternoon we chased several whals but no way I have been
 so mad ever since I saw the gem that I dont care
 whether we get any more or not the gem got one a few hours ago
 Lat 41 - 07 And Long 27 - 35 East

Saturday 26 took one whale, mate struck and killed him
and after dinner we cut him in. had bad weather all day
and at night lay to under short sail
Lat 41 " 05 South And Long 28 " 48 East

Sunday 27th stowed down about 70 lbs in the storage
and chased several whales grate struck ore and hauled
Lat 41 " 11 South. And long 29 " 00 East

Monday 28th saw nothing and had not very good
weather Lat 41 " 00 South And Long 29 " 20 East

Tuesday 29th took one whale, mate struck and killed
him took him at noon and cut him in directly after
dinner and took in sail had rather bad weather all day
Lat 41 " 14 South Long 28 " 30 East

Wednesday 30th had not very good weather, we got
our whale to day and stowed down 50 lbs yesterday
towards night we saw the gun to windward boiling
Lat 41 " 18 South. And long 29 " 20 East

Thursday 31 it had fine weather and light winds
saw the mulwood to leeward blubber logged, saw one whale
mate pulled on to him. his boatsteeer darted under
water but did not fasten so and 1 820

Lat 24 " 24 South And long 29 " 25 East

January the 1st 1841

Early this morning saw one whale going very fast we chased him but we took breakfast and stowed down 50 bls

Friday 2nd saw nothing. Had a gale from north-west at 8 it blew fast but before it for the crozets latt 41° 28' long 30° 20'

Tuesday 12th we have been aging to the eastward ever since the 2nd and saw nothing but few backs we have plenty of wind and cold weather latt 45° 30' long 43° 27'

on board the Curant

Theodore Franklin was married
the 14 day of August - 1877.

Barque monmouth March the 1st 1841,
Begins with fair weather first part saw plenty of
whales lowered and capt struck one and boatsteerer
killed her she had the calf with her with capt killed
and took along side mate and myself kept the
cow untill she sunk we took up the boats and
commenced cutting and capt lowered again and
struck another calf he held on about one hour
and cut from him and started on board before
he got back we finished cutting and lowered the
two larboard boats for another whale but returned
without success just before sunset saw two more
lowered the larboard boats put from us
latt " South And long " East

Tuesday 2nd first part was quite rugged and the wind
strong from southwest at noon it moderated and we
set the topsails gill and sparker; after dinner raised
several whales and lowered three boats and I struck and
killed one we took him along side and took in sail
and saw the harvest take a whale at the same time and
great numbers of whales in sight latt 44° 04' long 51° 15'

Wednesday 3rd commenced cutting in the morning and
finished at 9 clock a.m. we had bad weather all the
remaining part of the day so that we made
no sail at all but started the works again in the
latter part we broke out one side in the fore hatch
between decks and stowed down about 75 lb
latt 44° 10' South long 51° 20' East

Thursday 4th had rather bad whaling weather all day
the cooper and myself employed at setting up shooks
all day, latter part we saw the harvest boiling but
saw no whales nor looked for any for we have so much
already we scarcely know where to put it
latt 43° 00' South long "

Barque Monmouth March 5th 1841

Friday morning commenced breaking out the main hatch about the same time we saw some whales and lowered capt struck one and hauled, saw the harvest rich at hand running for whales and capt went on board but did not stay a great while, came on board and commenced breaking out again but we saw more whales soon after and capt lowered and got one, took him along side and took in sail and chocked off the hold for good

latt 43° 50 long 51° 50

Saturday 6th had a heavy gale north and east so that we could not cut at all, about 11 o'clock we made an attempt but all to no purpose, at 1 it began to moderate and moderated all night latt 44° 00 long 52° 00

Sunday 7th had tolerable fair except foggy we commenced cutting quite early and finished about 9 o'clock and started the works. saw a very large ice berg to windward latter part we saw plenty of whales but did not lower on account of the fog latt 44° 00 long 52° 00

Monday 8th had fresh gales all day and foggy saw several whales but did not trouble them on account of the fog, so we are contented with boiling what we have got untill better weather latt 44° 04 long 52° 00

Tuesday 9th had fresh gales all day and commenced stowing down in the after hatch between decks and finished at night. saw ~~nothing~~ all day about 11 o'clock C & M saw 2 whales, lowered and I struck one of them and one was hauled and the other broke and he improved his only chance latt 44° 30 long 52° 00

Wednesday 10th had strong winds from the west all day commenced early in the morning to stow down in the storage and finished at noon. latter part broke out for butter - pickles &c,

latt 45° 10

long 52° 40

Barque Monmouth March 11th 1841,
Thursday first part had thick weather and fresh breezes
from the north and westward and stowed down about
35 bbls in the fore hatch, after dinner stowed some
water in the blubber hatch for passage water all the
latter part had rain latt 44° 48' long 52° 00'

Friday 12th all the first part had thick fog, but not
much wind about one o'clock it cleared away a little
we raised whales and lowered but it thickened up
again so that let them go latt 44° 20' long 51° 00'

Saturday 13th had strong wind all day and saw several
whales but could not lower on account of the weather
but obliged to lay and look at them, - it don't
look right where we only want two more
latt 44° 00' long 51° 00'

Sunday 14th had fair weather all day carried all
sail to southward saw two large islands of ice to
windward about sunset we saw 5 or 6 whales
to windward among the ice we carried all sail
until 8 o'clock and then took in sail
latt 43° 53' latt 51° 20' long

Monday 15th this morning found the weather
pretty coarse we saw two or three whales and lowered
before breakfast but without success about 9 o'clock
we stood along under the lee of any ice island and
saw two or three whales lowered and I struck and
killed one of them took him along side and
finished cutting about 5 o'clock and grate lowered
for and struck another and I lowered and fastened
and we both hauled we took up our boats and made
sail for long island, wha - wha - wha
This day in latt 44° 14' South and long 51° 03' East

Tuesday 16th first part was thick and wind rather light
saw several whales, lowered two boats and started one of
them and it shut in thick so that came on board
and filled away again and the increased to a heavy gale and
at night have too latt " long

Barque Monmouth March 17th 1841.

Wednesday morning had tolerable fair weather so that we made sail and ~~set the topsails~~ started the works and the weather continued fair throughout the day lat^t long.

Thursday 18th all the first part was calize and broke out in the steerage and stowed down about 30 lbs of oil and stowed some water and bread in the blubber room

lat^t 42 "14 South long by chr 49 "14 East
long by lunar 48 "26

Friday 30th for the last 12 days I have been to bring to keep any account of the weather at all we got the standing sails aloft about 10 days ago and we have had all kinds of weather ever since and most of the time had the wind ahead some times we have a dead calize but it only lets go to get a better hold for after four hours calize we have a regular old torycane about two days, indrag ocean for ever lat^t 37 "08 South and long "

Wednesday 31st had a heavy gale from the westward all day and are a fine prospect of its long continuance. 30-ends E.

February 7th 1846

All this day had light wind and first and middle part foggy cut in one of our whales. We saw plenty of them about us lowered 2 boats and truck and killed one about 4 or 5 miles to windward. I left one boat by the whale and went on board, hauled the whales tail out of the water and made him fast and made all sail. Knight came on and shut in thick fog, he was obliged to leave him and by firing our large gun and building a large fire he found the ship, latter part at daylight commenced cutting and finished at 7 we then made sail in pursuit of the lost whale but could not find him, while in pursuit of him saw several others lowered and took one took him along side at noon. On Lat 43° 53' South And Long 48° 40'

Tuesday 8th

All this day had light wind and the first part fine weather cut in our whale and started the fire saw the Ontario of Sag Harbor take a whale latter part thick weather saw 2 whales and chased them without success. On Lat 43° 51' South And Long 48° 58'

First part had very strong wind from East northeast and dark cloudy weather with light mist & fair ship under all she could stay under at 8 o'clock double reefed the topsails the wind gradually increased at 10 took in the mainsail, at 11 the wind came round to east, tacked ship & took in fore topsail & 12 & spanker at 4 & 5 PM the wind died away & there was very thick fog at short intervals the fog broke away & showed dense masses of clouds hanging all round the horizon the first part the Barometer stood at 28.45, at 10 o'clock 28.85 latter part at Noon 28.64 & there was about a stand from 8 to 12 latter part had light wind & light fog but the most of the day in latter part dark heavy clouds continued to rise in almost every direction followed by fresh gusts of wind. & then would break away only to give place to another but had not much rain Temperature 47 In Valt 34 S 32 54° 00 South & Valt 33 S 32 64° 30 West

Wednesday February 21st

Commenced with strong gales from the East & very dark boisterous weather ship under all prudent sail heading south southeast first part sent down the fore topgallant yard & took the waist boat in & secured her on deck took in the mainsail and 12 saw a ship to windward under short sail standing to southward at 4 o'clock wore ship to the northeast the ship to windward I believe were also the wind hauled to E southeast but continued to blow in strong gusts preceded by short lulls at 6 PM the mercury commenced rising 8 o'clock stood at 28.73 temperature 47 Middle part continued boisterous at 4 AM all furled the foresail carried neither gill or spanker During the night at 8 AM set the fore topsail double reefed gill & spanker at 10 reefed the Main sail & set it at daylight thermometer stood at 42 & Barometer at 28.52 At noon it stood at 28.62 & thermometer at 47 but the wind continued full as strong as at any part of the night, saw the sun twice at 10 got an altitude again at noon for a few minutes Valt 53° 24 S Valt 65° 18 West

Thursday February 22nd

Wist part had nothing but the same old story revived
had the wind from the southeast with heavy squalls
from noon to 8 in the evening thermometer rose from
47 to 48 or 1 Degree M from 2 to 8 in the evening Barometer
rose from 28.12 to 29.14 got soundings in 55 fathoms
Brown sand M small shells stood to west or south west
by the wind untill 4 P M M the wind hauled more to
southward tacked ship to the eastward at 8 had the
wind south heading East southeast saw the ship we
saw yesterday standing the same way but not so far to
windward at 8 the weather rather moderated M finally
all died away untill 4 in the morning when a light
air sprung up from the northeast M gradually increased
at noon had a fine breeze from 8 in the evening Barometer
continued to rise at 8 A M stood at 29.05 thermometer at
48 Barometer then began to fall at noon stood at 29.03
saw a ship to windward who ran down across our forefoot M
set his studding sails ran about 5 or 6 miles M finally hauled
them in Braced up M stood along with us, probably found
a mistake in his longitude all the latter part was thick weather
the sun was not visible Ch. Watt Cy D R 53rd 54th South
Long by D R 14th 39 West

Friday February 23rd

Commenced with strong wind from the northeast M very thick
weather with a little rain ship under all sail to southeast
our old pard - 9 to seaward - 10 at 2 P M took in the
fore topsail M fly gill at 5 took in the Main top gallant
sail M double reefed the topails at dark the wind increased
very suddenly with rain took in sail M hove to at mid
night wind all died away supposed ourselves in or near the
vicinity of the straits of Genoa which current in an opposite
direction from the wind raised a tremendous swell in
different directions at daylight thick masses of dark heavy
clouds ever hanging all about the horizon saw Staten Land bearing
about south set the topsail M mainsail spoke the ship Aligul of New Bedford M
in the morning had a moderate breeze from the south or west which increased
very fast and at noon had a heavy gale took in every thing but close reefed main topsail
Lat 54th 52 South Long 14th 30 West

Saturday February 24th 1844

Commenced with a determined heavy gale from the west the sky obscured with light fleecy clouds so that no part of it was visible at 2, 3, & 4 in the afternoon it blew almost with the violence of a hurricane, the Barometer began to rise rather before the height of the gale reached us. which previously had fallen to 28" 54 Thermometer at 4h at 8 & 10 it rather decreased & at midnight had tolerable fair weather except a heavy swell at 5 o'clock A.M. set double reefed topsails & mainsail at 10 struck out the reefs all the part had fine clear weather with a good breeze from the West ship close hauled to south by the east the wind blew throughout the gale from southwest instead of west at noon Barometer stood at 29" 24 having risen $\frac{1}{16}$ in although the wind continued about the same In Watt at noon 54" 38 South And Long by Chron 62° 04 West found the current setting about east by the north east at 2 miles an hour

Sunday February 25th

Commenced with a strong breeze from the southwest & clear weather at 2 P.M. doubled reefed the topsails the wind increased although the Barometer continued to rise, at 4 P.M. stood at 29" 43 Thermometer at 44 at midnight it began to moderate very fast, made all sail again latter part had no wind at all saw a large number of finches the weather was exceedingly fine the Mercury stood high In Watt 55" 17 South & Long by Chron 62° 00 West

Monday February 26th

Commenced with a light air from the Northeast & fine weather, the wind in a few hours increased to a fresh gale which continued through the night, the Mercury began to fall about 2 hours before the breeze commenced which continued to fall until 6 o'clock A.M. when it stood still & at 8 rather began to swell again & at 9 the sea all died away & hauled suddenly round to west southwest & continued foggy throughout the night remainder of the day from 4 o'clock to 7 A.M. had considerable rain, & stood In Watt by Chron 56" 40 South & Long by Chron 64° 28 West

Tuesday February 27th 1844.

First part had light wind from the northwest & thick hazy weather middle part had fresh wind & squally with a heavy swell at 10 o'clock A M double reefed the top sails & furled the mainsail & Watt 57° 58' South & Long 144° 45' West.

Wednesday February 28th

Brought this day had very strong wind from northwest to southwest & very boisterous weather first part ship under close reefed topsails took in gill & spanker at 9 o'clock P M furled the fore topsail at 10 took in every thing except close reefed main topsail & here to, to northward, had a considerable fall of the Mercury previous to the commencement of the gale which continued to fall gradually untill about 2 hours before the gale broke when it began to rise quite slow at 11 P M set the fore sail fore spencer & fore topmast staysail, had a tremendous heavy swell from the westward throughout the day and a part of the day previous Watt by 57° 49' South & Long by 144° 50' West

Thursday February 29th

Commenced with a raging gale from the south & westward & thick weather at 4 P M set double reefed topsails gill & mainsail at midnight the wind all dropped away made all sail at 3 A M a light air sprang up from the southward & hauled gradually round to southeast & continued very light ship under all sail steering west, Magnetic Barometer at 29.13 Thermometer at 51 P M Watt by 57° 14' South & Long 145° 15' West

Friday February 30th

Commenced with light wind from the southeast & thick weather ship under all sail to westward Barometer standing at 29.18 Thermometer at 51

S
saw
No. 2

Friday March 1st 1844.

Throughout this day had light wind from the southward & thick weather ship under all sail to westward at 6 o'clock A M saw a sperm whale apparently freshen and alone, lowered & took him along side & commenced cutting, towards the latter part the wind began to freshen a little with a light mist, In Lat 56° 40' south by D R & Long by D R 17° 10' West

Saturday March 2nd

First part from 12 until 7 o'clock P M strong wind from the north & eastward with considerable rain, which made a sweet job for us to cut our whale, however at 7 or 8 P M we finished him when the wind all died away a few minutes & broke out suddenly from the southwest almost with the violence of a hurricane we took in every thing as soon as possible & hove to to north & westward under the main spencer at 8 A M raised Cape Horn Bearing Northwest I immediately wore ship & stood to southward judged ourselves about 17 miles from the land set the main topsail close reefed & foremast staysail & fore sail but was soon obliged to take it in on account of the most tremendous squalls that followed each other in quick succession throughout the day In Lat by obs 56° 15' South & Long by Chron 17° 24' West

Sunday March 3rd

First part had strong gales from the southwest & squally ship under close reefed main topsail to southeast, had employed at cutting up the Lark at 4 P M it began to moderate quite fast at 8 set whole topsail & foremast & fore sail & began to rise about 4 hours before I perceived any alteration in the weather at 9 in the evening passed a small brig bound eastward but did not speak her latter part had light air from the Northeast with tolerable clear weather for the country although the sun was not visible Cape Horn & Diego in sight all the latter part at noon Cape Horn Bearing North dist 35 miles Diego Bearing Northwest dist 18 miles, saw a small Bark, eastern with stump topmasts bound to westward, employed at Boiling

Monday, March 4th, 1844.

Commenced with light air from Northeast & thick cloudy weather ship under all sail to southwest employed at hoisting at 6 P M the wind hauled more hauled round to westward accompanied with light rain double reefed the topsails & furl'd gill & spanker the weather had every appearance of a sudden gale although there was no great fall of the Mercury which at 8 stood at 29° 32' Middle & latter part had a middle part fresh wind from the westward with moderate rain ship under double reefed topsails heading south southwest at daylight finished hoisting & sailed down the works latter part had light wind & fine weather saw no land at all ~~the~~ at 8 A M tacked ship to northwest & shook out the reefs at noon. In Latitude 45° 35' South current N E 2 1/2 miles per hour & Drift by Chron 4 1/2 " 3 1/2 West

Tuesday March 5th

Commenced with very light air from the westward at 4 P M a light breeze sprang up from the northward ship under all sail to southwest all hands employed at stowing down in the main hatch In Latitude 56° 41' South & Drift 6 1/2 " 1 1/2 West

Wednesday March 6th

Throughout this day had light baffling wind from Northwest to southwest ship under all sail to westward Cape Horn in sight Bearing N by East, can't tell which goes to westward fastest Cape Horn or us

Thursday March 7th

First part of this day had moderate wind from the southwest but smart squalls occasionally, saw a large gam of sperm whales going very fast to the eastward lowered for them but without success at noon Cape Horn in sight Bearing Northeast by East Diego Bearing West Southwest

Friday March 8th 1824

First part had almost or quite a calm & fine weather
ship heading west southwest & going stern foremost
Middle & latter part had strong wind from the
southwest & very squally ship under all present
sail beating to westward at noon Diego Bearing
west by North Dist 23 miles

Saturday March 9th

First part had strong wind & very squally ship
under topsail beating to westward but not
unfrequently had to settle them on the cap on account
of the violent squalls which followed each other
in quick succession, at 6 P.M. Diego bearing west
by south squared in a little & kept off to seaward
often run through between the islands & the main land
first part saw 2 right whales & chased but without
success latter part had the wind from the same quarter
south, but very light In Watt 5h " 10 South & Day 7h " 00

Sunday March 10th

Throughout this day had light wind from the south &
fair weather ship under all sail steering west by north
first had some current setting to southeastward latter
part did not perceive any at the wind hauled to east &
increased to a fine breeze Barometer fine the last 4 or 5
days has stood high mostly from 29 " 85 to 30 " 00
temperature 42 to 44 In Watt 55 " 52 & Day 72 " 39 West

Monday March 11th

First part had a fine breeze from the east & fine weather
ship under all the sail we could set, sent one topmast
studding sail boom aloft bent a sail & set it, the land in
sight at a considerable distance latter part had the wind
light bent a lower studding sail and set it In Watt
by O R 55 " 30 & Day 7h " 00 West

Tuesday March 12th 1824

Thruought this day had light wind from the eastward
(in) thick foggy weather ship under all sail to the westward
latter part the wind heaved to northwest but continued
very light In Lat $55^{\circ}25'$ South & Long $76^{\circ}30'$ West

Wednesday March 13th

First part had light wind from northwest (in) west with
thick fog latter part had strong wind from the southwest
ship under all sail to North & westward at noon
In Lat $53^{\circ}58'$ South & Long $78^{\circ}55'$ West

Thursday March 14th

Thruought this day had strong wind (in) very squally
from the southwest ship under all present sail to
Northward saw nothing In Lat by Obs $50^{\circ}28'$ South
& Long $79^{\circ}00'$ West

Friday March 15th

Thruought this day had a gale from the south
(in) squally ship under all sail steering north
magnetic at noon in Lat $47^{\circ}25'$ South & Long $78^{\circ}58'$ West

Saturday March 16th

south (in) eastward (in) squally ship under all sail to northeast
saw nothing In Lat $39^{\circ}10'$ South & Long $76^{\circ}45'$

Tuesday March 19th 1844

First & Middle parts had light baffling winds & squally saw nothing latter part had a moderate breeze from east & southeast & fine weather ship under all sail close hauled to Northeast In Watt " South & Long

Wednesday March 20th 1844

Spent this day had beautiful weather & calm & nothing in sight the carpenters employed at repairing boats & the watch employed at ship duty In Watt 32° 40' & Long (45) 50' West

Thursday March 21st 1844

Spent this day had light wind (m) fine weather at 4 P.M. saw black fish & got 2 of them at 7 ~~o'clock~~ A.M. Made the land bearing east Northeast, called it St Maria Islands south part ship under all sail steering Northeast

Friday March 22nd 1844

First part had fresh wind & fair weather ship under all sail for Talcumun at dusk arrived off the mouth of the harbor, took in or shortened sail & lay off and on through the night at daylight Made all sail & steered for the harbor, had the wind very light, passed Kerekeema at noon

Saturday March 23rd

This day commenced off Kerekeema with a light breeze from the northward ship under all possible sail steering up for the anchorage at 2 P.M. anchored & furled sails & sent one watch on shore

Sunday March 24th

This day one watch on liberty, received from shore 12 casks water 15 lb fresh beef & vegetables &c

Monday March 25th 1843

This day one watch on shore, received on board
five casks water & commenced painting ship

Tuesday March 26th

This day one watch on shore on liberty
& the other watch employed at painting ship

Wednesday March 27th

This day one watch on shore on liberty, received
on board 10,000 sticks of wood, had light rain.

Thursday March 28th

This day one watch on liberty and the other
watch employed at stowing away wood

Friday March 29th

This day one watch on liberty, and the other
on duty received on board 80 bushels potatoes

Saturday March 30th

This day all hands on board sent down
the fore topsail yard, overhauled & sent it
aloft again

Sunday March 31st

Commenced with fresh wind from the southward
at 4 P.M. got our anchor & stood out to
sea middle & latter parts had very light wind
& calm latter part had very thick fog

Monday March 1st

Throughout this day had light baffling winds
and thick weather the land in sight but about
30 miles saw 2 Briggs standing in for the land
Ship under all sail working to North & westward
In Batt 3 P.M. 24 South 30 Day 2400 West

Tuesday March 2nd 1844

First & Middle party had light wind from the
Northwest & thick weather at 8 A.M. it hauled
suddenly to southeast, & squarer in and steered off
Northwest for compass In Lat 33° 59' South

Long 75° 13' West

Wednesday March 3rd

Throughout this day had fresh wind from south southeast
& fair weather ship under all sail steering
North Northwest the watches variously employed
In Lat 31° 53' South & Long 75° 43' West

Thursday March 4th

Throughout this day had strong wind from
South East & fair weather ship with all she
can spread steering North Northwest In Lat 38° 56'

Long 76° 24' West

Friday March 5th

Throughout this day had strong wind from
the southeast & fair weather ship under all
sail to North Northwest the watch variously employed

Saturday April 6th

Throughout this day had strong wind from the
Southeast & fair weather ship under all prudent
sail to North Northwest, the watch variously employed
In Lat 23° 29' South & Long 78° 20' West

Sunday April 7th

All this day had strong wind from southeast & dark
weather ship under all sail North Northwest the
day being the sabbath had no labor done on board
In Lat 21° 53' South & Long 79° 00' West

Monday April 8th

Throughout this day had moderate wind & thick weather ship
under all sail to North Northwest the watch variously employed

Friday April 12th

Throughout this day had light wind from the southeast & dark weather with light rain squalls ship under all sail to North Northwest the watch variously employed In Lat 13° 18 South & Long 83° 40 West

Saturday April 13th

Throughout this day had light wind & fair weather ship under all sail to N Northwest the watch employed at ship's duty saw nothing In Lat 11° 53 South & Long 85° 10 West

Sunday April 14th

Throughout this day had light wind & fine weather with the exception of light rain squalls occasionally ship under all sail to N Northwest the watch employed at ship's duty In Lat 10° 04 South & Long 85° 07 West

Monday April 15th

Throughout this day had a fine breeze from the Southeast & thick cloudy weather ship under all possible sail to North & westward In Lat 8° 05 South & Long 85° 52 West

Tuesday April 16th 1844

This day had fresh wind from the northeast
& dark weather ship under all sail to north
& westward the watch employed at setting up
the main rigging latter part had light rain
In Lat 16° 21' North & Long 88° 51' West

Wednesday April 17th 1844

Permeant this day had moderate wind & dark
rainy weather Most of the day ship under all
sail to North & westward what good weather
we had. The watch were employed at altering to
New Main Sail In Lat 4° 42' & Long 89° 48' West

Thursday April 18th

Permeant this day had light wind and thick
rainy weather ship under all sail to north &
westward saw nothing Lat 2° 42' North Long 92° 00'

Friday April 19th

Permeant this day had light wind & thick
weather ship under all sail to north & westward
the watch employed at ship's duty
In Lat 2° 07' North & Long 92° 30' West

Saturday April 20th

Permeant this day had light winds & fair
weather ship under all sail to North Northwest
saw a great quantity of fish & had strong current
setting to South & eastward Lat 1° 40' Long 91° 50'

Sunday April 21st

Permeant this day had light fair & calm ship
under all sail to Northwest the day being the
sabbath had no labor done on board
In Lat 1° 24' North & Long 91° 30' West

Monday April 22nd 1844

Brought this day had light air & calm ship under all sail to North & westward the watches employed at ships duty In Lat 1° 17' South & Long 91° 00' West

Tuesday April 23rd

All this day had light airs and thick hazy weather ship under all sail to northward at 8 o'clock A.M. Made the Gallapagos Islands latter part had no wind at all the watches variously employed In Lat 10° 59' South & Long 91° 25' West

Wednesday April 24th

Brought this day had light wind from the southeast & fine weather ship under all sail towards the land, called it Clatham Island

Thursday April 25th

Brought this day had light wind & fine weather latter part was becalmed of the Island of Allernarke, Dist about 6 miles, & pulled in shore & caught a fine parcel of Cod fish & got on Board again at noon when a fine breeze sprang up from the southwest, set everything and proceeded on our course

Friday April 26th

Brought this day had light wind & fine weather pulled in shore with two Boats at the North end of Allernarke Island with the intention to land in pursuit of terrapin But could not land, caught a few fish & several fowls and returned on board at 3 o'clock P.M.

Saturday April 27th

First and Middle part thick hazy weather and the middle part rainy with light wind from the northeast latter part had the wind the same with fine weather saw several Islands on our starboard
how very good 197 7 200

Sunday April 28th 1844
Throughout this day had light wind & fine
weather ship under all sail to North & westward
had considerable current setting to North & eastward
In Lat 1° 48' North & Long 92° 00' West

Monday April 29th 1844
Throughout this day had light wind & fine
weather, ship under all sail to North & westward
the watch employed at mending sails
In Lat 2° 18' North and Long 94° 40' West

Tuesday April 30th
Throughout this day had light wind & fine
weather, about the mainsail & bent another
the remainder of the day employed at mending sails
In Lat 3° 28' North and Long 95° 55' West

Wednesday May 1st 1844
Throughout this day had light wind from the southeast
& the most part fine weather, latter part had
light rain, bent a new main Topgallant sail,
ship under all sail to North & westward
In Lat 4° 30' North and Long 96° 55' West

Thursday May 2nd
Throughout this day had light wind & rainy weather,
the wind from southwest, latter part the watch
employed at washing ship, ship under all sail to North & westward
In Lat 4° 50' North and Long 97° 20' West

Friday May 3rd
Throughout this day had light wind from the southwest
with rain ship under full sail to North & westward
latter part it cleared up, the watch employed at
ship's duty In Lat 5° 20' North & Long 98° 00' West

Saturday May 4th 1844

Thruought this day had light wind and fair weather ship under all sail to north & westward, the wind from southwest the watch employed at making rigging saw a large waterspout on westward about 11 miles off In Lat 7° 45 North & Long 98° 55 West

Sunday May 5th

Thruought this day had light baffling wind & rain ship under all sail to north & westward, nothing going on In Lat 9° 15 North & Long 99° 50 West

Monday May 6th

Thruought this day had pass wind from the north & westward and squally weather, latter part had strong symptoms of a change of weather ship under all sail to north & westward In Lat 9° 16 North & Long 100° 13 West

Tuesday May 7th

Thruought this day had light wind & fine weather the wind from the southeast, ship under all sail to north & westward the watch employed at making rigging In Lat 10° 07 North & Long 101° 01 West

Wednesday May 8th

Thruought this day had light wind & fine weather ship under all sail to north & westward the watch previously employed, In Lat 10° 35 & Long 102° 00 West

Thursday May 9th

This day had light wind from the southeast & fine weather ship under all sail to north & westward with a constant lookout at the northward

Friday May 10th

First part had light wind from the southeast & fine weather ship under all sail to north west middle part had it squally & at short intervals calm, latter had fine weather & a light breeze from southeast In Lat 11° 53 North & Long 104° 10 West

Saturday May 11th 1854
Throughout this day had fresh wind from fair weather
the wind from northeast ship under all sail to
North & westward with a constant look out at the
Headland In Lat 12° 48' N Long 106° 00' West

Sunday May 12th
Throughout this day had fresh wind from the northeast
and fine weather ship under all sail to North Westward
In Lat 13° 41' North and Long 107° 08' West

Monday May 13th
First part had light wind from the southwest &
thick weather ship under all sail to North & westward
latter part had no wind at all
In Lat 14° 04' North & Long 108° 17' West

Tuesday May 14th
Throughout this day had light wind from the southeast
& fine weather ship under all sail to North
& westward In Lat 14° 13' N Long 109° 07' West

Wednesday May 15th
Throughout this day had light wind from the northeast
& fine weather, ship under all sail to Northwest
with a constant look out at the Headland & nothing to
be seen In Lat 14° 51' North & Long 109° 57' West

Thursday May 16th
Throughout this day had light wind from the northeast
and fine weather ship under all sail to North & westward
all hands employed at breaking out & Coopering our
Bread and uttering our Blubber room
In Lat 14° 48' North and Long 111° 00' West

Friday May 17th
First & middle parts had very light wind from northeast and fine
weather latter part had strong wind, ship under all sail
to North & westward In Lat 15° 13' N Long 112° 10' West

Saturday May 18th 1844

Peruought this day had strong wind from the Northeast & fair weather ship under all sail to North & westward
In Lat 15° 50 North & Long 114° 18 West

Sunday May 19th

Peruought this day had strong wind from the Northeast & fair weather ship under all sail to the North & westward

Had fine weather all hands Wooding.

Friday Dec 20th

Had fine weather all hands Wooding.

Saturday Dec 21st

Had a moderate Breeze & fine weather. Put David Killis in the rigging & gave him a Dose for insolence & abuse to Second Mate, employed at getting wood.

Sunday Dec 22nd

Had fine weather, all hands at rest.

Monday Dec 23rd

Had fine weather, Wooding & stowing it away

Tuesday Dec 24th

Had fine weather, first part employed at getting wood, latter all hands employed at stowing it below & making preparations for sea

Wednesday Dec 25th 1824 3.456.

Commenced with light wind from the Westward, at 4 P M got under way for sea in company with the English Bark, at night the wind all died away & obliged us to anchor, at daylight got under way again with light air from the Eastward, which soon died away.

Thursday Dec 26th 1824

Commenced fair, a light Breeze springing up from the North-west. Both ships under all sail to South & Westward, latter part had a fine breeze from the North. Lat 20° 18' North Long 108° 55' West

Friday Dec 27th 1824

First part had strong wind from Northward ship under moderate sail to south & Westward in company with our consort, latter part had a high irregular sea & but little wind.

Saturday Dec 28th

Had light wind & fine weather, ship under all sail for the island of Socra

Sunday Dec 29th

Had light wind & fine weather, at 1 P M made the land, stood in for it untill 4 & I hove aback, latter part pulled in shore but did not land, saw many birds & chased,

Monday Dec 30th

Had fresh Wind & fair weather, ship under all sail standing off to Eastward, latter part spoke the Ship *Warren*, of *Warren*, tacked & stood in again.

Tuesday Dec 31st

Had moderate wind & fair weather, stood in shore untill night & stood off & on through the night, latter part pulled in shore a fishing,

Wednesday, Wednesday January 1st 1845

Had Moderate Wind & fair Weather. Ship standing off
at 3 P M Boats returned from fishing quite successful.
Stood off to Eastward untill Midnight & then stood back,
latter part had the Wind very light. Stood off to South-west

Thursday January 2nd

Had Moderate Wind & fair Weather. Ship under easy sail
standing to south-west at 4 P M spoke the Warren
again. Capt Gardner came on Board to tea, latter part
Ship under easy sail to southward
In Lat $17^{\circ}15'$ North & Long $111^{\circ}21'$ West

Trees

There are a great many kinds of trees such as Willow. Elm. Birch. Oak
Fir. Maple. Chestnut. poplar. Lanthus. Hickory, ~~Walnut~~ and a
great many others.

Fruit

There are many kind of fruit such as apples. pears. cher-
peach.

Flowers

There are a great many flowers such as daffie rose
polyanthus cowslip marigolds sweet pea marigolds mignon
pinks foxglove flowering almond geranium pansy
lady slipper daisy

Topsy

Topsy she was never born
She had not mother
Specs I growed a nigger bet
Just like any other
Whip me till the blood runs down
Old missus used to do it
Said she would cut my heart right out
But we could get at it
Got no heart I don't believe
Niggers do without them
They heard of God and love
So can't tell much about him

Chorus This is Topsy
Topsy cute and clever

This is Topsy
Topsy cute and clever

Topsy she was never born
Never had no mother
Specs I growed a nigger bet
Just like any other
Whip me till the blood runs down
Old missus used to do it
Said she would cut my heart out
But we could get at it
